

BIZARRE BUT BRILLIANT

Every now and then a new invention hits the shelves that's at once so simple and so useful it leaves you wondering – why has nobody thought of this before? The **Source ConverTube** (£15.99) is one such item. This clever adapter tube will convert your water bottle into a hydration system. It works with Sigg, Nalgene or mineral water bottles, fits through the ports of any hydration-compatible backpack, and uses antibacterial technology to keep your water tasting fresh.
